MONTANA'S ACHIEVEMENT.

The Largest Gold Bar Ever Seen is Melted Montana is great in many things. It has the greatest gold, copper and silver mines in the world; enjoys the reputation of being the greatest mineral producer; it has lowed to register, and as many cannot a a great climate; it has Helena, the richest present place their hands on them they recity of its size in the Union; it has the largest plunge bath in the world; it has the

frain from attending to register. Every person applying to be registered must subfastest race horse in the world, and last scribe to the following oath: "I do sol night in the United States assay office in Helena the largest gold bar ever melted in emnly swear or affirm that I am a citizen of the United States (or that I have de the history of the world was cast under the supervision of Spruille Braden, assayer clared my intention to become a citizen of in charge of the office. The Penobscot the United States); that I am of the age of in charge of the office. The Penobscot bar made years ago in Helena, which was worth about \$30,000, fades into insignificance when compared with this bar.

The actual value is \$101,385.50 and weighs 7,000 ounces. It is eighteen inches long, ten inches deep, eight inches across the top and six inches across the bottom. The work of making it was no small task. At 12 o'clock yesterday Mr. Braden handed out the necessary gold, which was placed in a No. 100 crucible, the largest size made. This crucible was first placed on an intensely hot fire, which was made still hotter by a bellows. The crucible was barely twenty-one years and will have actually and not constructively been a bona fide resident in Montana six months and in the county thirty days next preceding the day of the next ensuing election, and that I am not registered elsewhere in Montana for this electoral year, so help me God."

If the registry agent is not satisfied that

would result in killing the plants, in the same way that Canada thistles, quack grass and other perennial roots are killed by starving the growth.

Between these two extremes, the medium, which should be observed, is to cut frequently, but not so short as to deprive the grass plants of their leaves and vigor. Tall stalks and seeds should be prevented on one hand, and close shaving avoided on the other. On a very smooth surface the lawn mower may be set to cut within an inch of the ground, but a healthy green carpet excellent and the ground. the ground, but a healthy green carpet could not exist under such heavy treatment. As a general rule the grass should never be sheared nearer than two inches of the ground. Many lawns are cut much shorter. It may be well to allow greater length for a new lawn, or for older ones early in spring; well. What could possibly have suggested and a greater growth should be permitted after the middle of autumn to serve as winfor his tales the miraculous change of Io or of Daphne? The case which is exciting so much attention at the Saltpetriere just now may, perhaps, suggest a solution. A pretty girl of 15, fair-haired, blue-eyed and pleasured in at intervals transformed. ABOUT LEADVILLE.

What Henry Bratnober Observed Henry Bratnober, the well-known mining man, has returned from a visit to Lead-

ville. He says the old mining camp is a busy place, but not what it used to be in the boom period. The rich mines are nearly worked out, but still the many smelters are working and the people claim that the output for 1889 will be greater than that of 1888. He heard of several good strikes being made during the year, but taken as a whole Leadville to-day is a smelters are working and the people claim It will Take Water From a River and Carry it to Any Height—What

It Is.

Montana possesses abundant water to irrigate every acre of land within its borders. While this fact has been demonstrated, the question of how to get the water on the lands has not been solved satisfactorily. Ditches and canals are thought to be the only resort, with storage veservoirs.

but taken as a whole Leadville to-day is a low grade camp. In years gone by ores worth \$10 and \$20 to the ton were cast aside on the dumps and some of these elites were little mountains in themselves. By the facilities of modern times elves. By the facilities of modern times these ores are made to pay for working and the principal mining of the place is now centered in extracting the low grade camp. Is mines are now because that Leadville is by no means a played-out camp. Its mines are now being developed on a sound business basis and there is enough ore exposed in the numerous workings to keep the smelters busy for years.
